MINES AND MINING STOCKS FINANCIAL AND COMMERCIAI

SECOND PAYMENT ON BIG OPTION

Bingham Co. Will Pay \$10,000 to Eagle & Blue Bell Today.

WEDGE GOLD STRIKE A WHALE

DALY-JUDGE LAYS OFF 200 MINERS FOR A FEW DAYS.

According to schedule, the Bingham Consolidated company will make another \$10,000 payment on the purchase of the Eagle & Blue Bell control today. As stated last April when the deal was closed, the Bingham company has an option on 140,000 of the pany has an option on 140,000 of the 250,000 shares in the company at \$2 per share, or \$250,000. When the bargain was made the purchasing company paid \$10,000 and was given possession of the property with the understanding that certain development work was to be done and the entire purchase price paid by the end of the year.

or be done and the entire purchase price paid by the end of the year.

As far as the operation of the mine is concerned the Bingham company has a great deal more than lived up to its agreement, and in consideration of that fact it is understood that the terms of payment have been so modified by the controlling interests in the Eagle the controlling interests in the Eagle & Blue Bell company as to make the day of final payment some time ahead of January next, though a payment of \$20,000 more is to be made on Dec. 20.

Both sides to the undertaking are exhibiting the right spirit, and there seems at this time to be no doubt that seems at this time to be no doubt that the Bingham company will finally take absolute possession of the mine and count its control as a paid-up asset. The property was a 'nighty good one when the Bingham management took hold of it in April. Since then a vast amount of new work has been per-formed, the mine has been equipped with a splendid compressor plant and every effort exerted to demonstrate its That work is being coninued, and, it is said, with most grat-

On the part of the Eagle & Blue Bell management there appears to be a de-zire to treat the Bingham people with every consideration. It realizes that its mine is being systematically proven up, and while the work is liable to show that the sale was negotiated at very low price, in the light of new

New Undertakings Near the Sheba-

Kansas Professor Pleased.

up with the country." The new company's property, he says, has no work done upon it other than to prospect the ledge along its course on the surface, where it crops for 6.00 feet, and samples, on the average, 15 per cent lead, twenty ounces silver and \$5.00 in gold per ton. The vein is a contact between lime and porphyry and runs from four to twelve feet wide, the ore being identical with that found in the Sheba ledge at corresponding depth.

"Concerning the Sheba," said Prof.

For which the one being identical with that found in the Sheba ledge at corresponding depth.

"Toncerning the Sheba," said Professor Blackmar, "I should like to say that, after breading all the statements seem the Daly-Judge mines for ten days or the case of the baly-Judge mines for ten days or the baly-Judge mines for the days of the baly-Judge mines for the baly-Judge mines for the days of the baly-Judge mines for the days of the baly-Judge mines as a result of the closing down of the baly-Judge mines for the baly-Judge mines for the baly-Judge mines as a result of the closing down of the baly-Judge mines as a result of the closing down of the baly-Judge mines for the baly-Judge mines as a result of the closing down of the baly-Judge mines as a result of the closing down of the baly-Judge mines as a result of the closing down of the baly-Judge mines as a result of the baly-Judge mines as a result of the closing down of t

FROM THE NEWHOUSE MINES.

Contractor Dederich Tells What the

Winter Campaign Will Include, bederich returned from the properties of the Newhouse Mines & Smelters company yesterday morning, where they report ev-erything moving splendidly. Mr. Dederich, who is the whole thing at the present time, said that work on the big pipe line from Wah Wah springs was progressing rapidly.

rapidly.

"If the pipe is delivered according to contract," said he, "I shall have the line completed inside of the next sixty days. When that is done, the balance of the fall and winter will be taken up in building the concrete foundations for the numerous buildings that will follow and the foundations for the immense amount of machinery that will be employed in equipping the various works of the company. I have a large force of men at work now, the number will be largely increased by and by."

"ALL KINDS OF GOLD."

That Is What the Late Strike in the

Wedge Is Said to Show.

From all accounts. The Herald's report of the late strike in the Gold Vein Mining company's Wedge property, at Marysvale, the other day, does only partial justice to it. On Sunday George Romney, ir., one of the officers of the company, received a dispatch which advised him that five feet of ore "showing all kinds of gold" had been opened in a nine-foot ledge, and urging him to go down and see it for himself. He left for camp at once and, on his return to the railroad yesterday morning, he wired Secretary Bassett that he could confirm the report and stated that he would reach home to day with samples of the ore.

"In an upper tunnel," said Secretary Bassett during the afternoon, "we had uncovered about eighteen inches of very fine ore. There are several tunnels on the property and we decided to cross-cut from the bottom of a winze in the tunnel below the one where the good ore was found and see if we could not get the Wedge Is Said to Show.

me chute at considerable additional pth. This last strike was made in the in cut by the drift run from the bottom the winze and I understand they have en working both ways in the ore. I we reason to believe that the strike is I that is claimed for it, but we shall we full particulars upon Mr. Romney's turn."

Writing from Richfield, under date of tesday, The Herald's correspondent totes L. H. Outzen of that place, who digust returned from the mine, as fol-

"While there have been strikes and strikes, this one seems to be far ahead of anything so far reported. I went into the workings of the property and saw the latest disclosures, and it is astonishing to see the vein they have uncovered. There is a solid vein, about thirty inches thick, I should judge, and the rock sparkles with native gold. It is one mass of the pure metal, but as to what the assay values are I cannot say."

NORTH OF THE GEMINI.

Believed That Tintic's Next Big Mine

Will Be Found There.

Believed That Tintic's Next Big Mine

Will Be Found There.

"More interest centers in the developments going on in the Genini mine at Europeants going on in the Genini mine at Europeants going on in the Genini mine at Europeants of the Committee of the Center of the C

ground lending a good deal of weight to this theory.

"All these different ideas and theories have their advocates in camp, just as local interests always do, but the main fact of overshadowing interest to the people of Eureka, and incidentally to all of Tintic, is just where these well known ore bodies are pointing, and who will be the lucky owners of the ground when the fact is demonstrated.

"That another Grand Central and Centennial-Eureka country is about to be opened up in the locality I have been speaking of there seems to be no question, and a significant fact is that all the ground within a mile north of the Gemini has been patented and good titles secured by those who have been posted on developments.

About 200 Miners Are Temporarily
Out of a Job.

Park City, Aug. 19.—Two hundred and fifty men are temporarily out of employment as a result of the closing down of the Daly-Judge mines for ten days or two weeks.

The lay-off is caused by the fact that the years of constant operation have so worn the mine tracks that repairs are absolutely necessary throughout the entire workings. An extra force of men is on the repair gang in the old Anchor tunnel easing timbers and laying new track, so that when operations are again resumed the mine will be in a position to handle its output with much more ease and less expense.

Mining Suit Compromised.

Eureka, Aug. 19.—The Dagmar-Northwest Mining company has effected a compromise with Fred Brem, who obtained a verdict against it over it a year ago for personal injuries by the terms of which Mr. Brem becomes a stockholder in the crushed while working for the Northwest Mining company and was given judgment against it in Judge Marioneaux's court in June, 1902, for \$500 and costs. Motion for a new trial was overruled, and the case was appealed. By the terms of the compromise Brem gets \$200 in cash and 3,000 shares of the company's stock.

Ore and Bullion.

Manager George L. Moats of the Four Metals company left for Omaha on a short business trip yesterday.

The annual meeting of the American Flag company is scheduled for the first day of the coming month at Park City.

Receipts at the Taylor & Brunton sam-pler yesterday included four cars of ore from Frisco, four from Neveda, one from Tintle and one from Idaho. John A. Kirby, general superintendent of the Daly-West, came down from camp again Tuesday night on business which required his attention on this end of the

Harry S. Joseph returned from a several days' trip to Alta yesterday, where he has been making some surveys. He declared he was not at liberty to discuss details of what he had been doing.

Manager Reinart of the Colorado Springs Mining Record, who has been in the city for the past few days, left for Ogden last evening to start his wife and two children on their way to the coast, where they will visit for some time.

12s 6d. Iron closed at 51s 2d in Glasgow and at 46s 7½d in Middlesboro, Locally iron was unchanged for northern, but the quotations for southern were lower. No. 2 northern foundry. 17.50@18.00. No. 2 foundry northern, 16.50@17.00; No. 1 foundry southern and No. 1 foundry southern soft at 16.50@16.75.

Coffee and Sugar.

Coffee and Sugar.

New York, Aug. 19.—The market for coffee futures opened steady at an advance of 5610 points following better European cables and further demand from outside sources based apparently on the recent reports of damage to the new crop and talk that the crop now moving has been overestimated. Receipts, however, were full, and later the purchasing power grew less pronounced, while importers continued offering and room longs turned for profits. The close was steady at net unchanged prices. Sales were 18,000 bags, including September at 3.90; November, 4.1964.15; December, 4.456; 4.56; March, 4.704.475; May, 4.8564.90; July, 4.9565.00.
